

# International Symposium on Cell Engagers and Cancer Immunotherapy

JUNE 28-29, 2024, CROWNE PLAZA, SUZHOU, CHINA

## Speakers

Rony Dahan  
Weizmann Institute of Science

Chen Dong  
Westlake University

Yangxin Fu  
Tsinghua University

Thomas Gajewski  
University of Chicago

Philip D. Greenberg  
University of Washington

Vijay Kuchroo  
Harvard Medical School

Guideng Li  
Suzhou Institute of Systems Medicine

Hongtao Lu  
Elpiscience

Arlene Sharpe  
Harvard Medical School

Hong Shen  
Roche

Zhirong Shen  
BeiGene

Bing Su  
Shanghai Jiaotong University

Eric Vivier  
Innate Pharma

Jun Wang  
New York University

Changchun Xiao  
Sanofi

Registration

The symposium is an invitation-only event with seat limitation. To apply for attendance, please **scan the code**. A confirmation will be sent to you after the application is approved.

Sponsored by

# International Symposium on Cell Engagers and Cancer Immunotherapy

Agenda		Program Highlight	
TIME	TOPIC	SPEAKER	
8:30 - 9:00	Registration & Networking		
9:00 - 9:15	Welcome & Opening	Darren Ji (Elpiscience)	
9:15 - 10:00	The Biology behind PD1 Blockade	Arlene Sharpe (Harvard Medical School)	
10:00 - 10:45	Targeting T Cell Exhaustion in Cancer	Chen Dong (Westlake University)	
10:45 - 11:15	Tea Break		
11:15 - 12:00	T Cell Engagers: Past, Present, and Future	Zhirong Shen (BeiGene)	
12:00 - 14:00	Lunch		
14:00 - 14:45	Bispecific Macrophage Engagers (BiME) for Cancer Immunotherapy	Hongtao Lu (Elpiscience)	
14:45 - 15:30	Dendritic-T Cell Engager	Rony Dahan (Weizmann Institute of Science)	
15:30 - 15:45	Tea Break		
15:45 - 16:30	Harnessing Natural Killer Cells in Cancer Therapies	Eric Vivier (Innate Pharma)	
16:30 - 18:00	Panel Discussion: Scientific Progress and Trends of Cell Engagers	Rony Dahan, Yangxin Fu, Hongtao Lu, Zhirong Shen Moderator: Changchun Xiao (Sanofi)	
19:00 - 20:30	Biointron Dinner (Invitation based)		

**June 28**

# International Symposium on Cell Engagers and Cancer Immunotherapy

Agenda		Program Highlight	
	TIME	TOPIC	SPEAKER
June 29	9:00 - 9:15	Opening	Hongtao Lu (Elpiscience)
	9:15 -10:00	Rejuvenating TIL by Antibody-guided Cytokines	Yangxin Fu (Tsinghua University)
	10:00 - 10:45	Engineering T Cells to Eradicate Solid Tumors: Identifying and Overcoming the Obstacles	Philip D. Greenberg (University of Washington)
	10:45 - 11:00	Tea Break	
	11:00 - 11:45	Checkpoint Molecules, FoxP3+Tregs and Induction of Anti-tumor Immunity	Vijay Kuchroo (Harvard Medical School)
	11:45 - 12:30	Advancing Cancer Immunotherapy by Understanding Mechanisms of Resistance	Thomas Gajewski (University of Chicago)
	12:30 - 14:00	Lunch	
	14:00 - 14:45	Single Cell RNAseq Profiling Colorectal Cancer Immune Microenvironment	Bing Su (Shanghai Jiaotong University)
	14:45 - 15:30	Probing Novel Tumor-immune Feedback Modulators for Next-generation Cancer Immunotherapy	Jun Wang (New York University)
	15:30 - 15:45	Tea Break	
	15:45 - 16:30	Innovative Technologies for Advancing TCR-T Cell Therapies	Guideng Li (Suzhou Institute of Systems Medicine)
	16:30 - 18:00	Panel Discussion: Immuno-oncology Opportunities and Challenges	Thomas Gajewski, Jun Wang, Hongtao Lu, Bing Su Moderator: Hong Shen (Roche)
